

# Temperennials

By our own definition, temperennials are plants that are hardy in warmer parts of the country, but are generally not hardy in the north. Northern gardeners may grow them as annuals or houseplants, while southerners may be able to overwinter them successfully outdoors. See individual plant listings for specific hardiness information.

## General Temperennials

Temperennial DIGIPELIXIS® requires vernalization to bloom. The plants you receive from Walters Gardens, Inc. have already been chilled sufficiently for blooming.

**DIGIPELIXIS®**  
**'Berry Canary' PP27607**

**DIGIPELIXIS®**  
**ILLUMINATION® 'Flame' PPAF**

**DIGIPELIXIS®**  
**'Berry Canary' PP27607**  
**WGI Introduction**  
DIGBC72 (Foxglove) One of the longest blooming plants we offer. Hot pink flowers with creamy yellow, burgundy speckled throats are borne all the way around the stout spikes. Improved compact habit. Forms smaller rosettes of large, glossy, dark green leaves.  
G/2ft/LSp-MFa/Z8/72ct ©  
Asexual propagation prohibited.  
Recommended Finish Size: Premium 1-Gal to 2-Gal

**DIGIPELIXIS®**  
**ILLUMINATION®**  
**'Flame' PPAF**  
DIGIF72 (Foxglove) One of the longest blooming plants we offer. Flaming magenta pink flowers with cantelope orange, magenta speckled throats are borne all the way around the stout spikes. Very large landscape sized plant; forms multiple rosettes.  
G/3ft/LSp-MFa/Z8/72ct ©  
Asexual propagation prohibited.  
Recommended Finish Size: Premium 1-Gal to 2-Gal

## Finishing DIGIPELIXIS®

DIGIPELIXIS® grow vigorously to fill a 2-Gal container in 8-10 weeks, and we recommend that size for most growers due to their large, bulky crown. Finishing in a 1-Gal container is only recommended if you plan on a quick turn for a big spring weekend.

In frost-free climates, DIGIPELIXIS® can be grown outdoors in early spring at 45-60°F. If growing indoors, greenhouse temperatures should be maintained at 50-60°F. This is a tender plant—do not let temperatures fall below 38°F during production! Flowering occurs within 6-8 weeks after plants are rooted out.

Need more detailed growing information? Look under Grower's Corner for Cultural Sheets on [www.WaltersGardens.com](http://www.WaltersGardens.com) for growing information on DIGIPELIXIS® and other genera we offer.

# Tropical Perennials

## Colocasia 'Distant Memory' PPAF

For many of the early years of Walters Gardens, Harriet Walters was the lifeblood of the family business. She's remembered fondly for her incredible cheerfulness, kindness, and optimism, but especially for her infectious laugh and sense of humor. Even through all her years after being diagnosed with Alzheimer's, Harriet still maintained her sunny personality and silliness, as well as a deep sense of care and concern for each member of her family, even as she lost her mental function and memories. Harriet passed away in 2008, and it is in her honor that we will donate \$0.25 per plant sold to Alzheimer's research. The Elephant is a symbol for Alzheimer's Disease ("an elephant never forgets"), which is why we selected an Elephant Ear to be our cause plant.

**NEW! Colocasia 'Distant Memory' PPAF**  
**WGI Introduction**

COLDM20 (Elephant Ear) Tropical plant with huge, dark mahogany leaves. Very full habit. Its clumping nature translates to a large number of new leaves and quickly filling out a container.

T/4-4½ft/Z8-10/20ct ①

Asexual propagation prohibited.

Recommended Finish Size: 2-Gal

Colocasia 'Distant Memory' PPAF

Colocasia 'Black Swan' PPAF

Colocasia gigantea 'Thailand Giant'

Cordyline terminalis 'Cherry Cordial' PPAF

**NEW! Colocasia 'Black Swan' PPAF**  
**WGI Introduction**

COLBS20 (Elephant Ear) Dark, near black leaves are huge. This plant forms an upright, arching habit which showcases its jet black, glossy stems, coming from a single basal clump.

T/5-6ft/Z8-10/20ct ①

Asexual propagation prohibited.

Recommended Finish Size: 2-Gal

**Colocasia gigantea 'Thailand Giant'**

COLTG20 (Giant Elephant Ear) Gigantic seedling selection from *C. gigantea* seeds collected in Thailand by Petra Schmidt of Plant Delights Nursery. Glaucous green leaves up to 5ft long by 4ft wide each; grows even larger in warm zones. Fragrant, white, lily-like flowers. A must-have for your display garden. Incredible impulse sales item!

T/9ft/Z8-10/20ct ①

Recommended Finish Size: 2-Gal

**Cordyline terminalis 'Cherry Cordial' PPAF**

**WGI Introduction**

CORCC72 (Ti Plant) This sport of 'Chocolate Queen' shares the same attributes as its parent but with vibrant red coloration. Mahogany leaves are streaked with olive green and bright red. This plant forms an upright stalk of wider than typical, strap-like foliage.

T/18-24in/Z10-11/72ct ①

Recommended Finish Size: 4-in to 1-Gal

# Succulent Perennials

New!

**Agave americana 'Opal'**

**Agave bracteosa 'Monterrey Frost'**

New!

**Agave bracteosa 'Stingray' PPAF**

**Agave 'Desert Diamond' PP26384**

**Agave desmettiana 'Desert Sunset'**

**Agave gypsophila 'Ivory Curls'**

**NEW! Agave americana 'Opal'**

AGAOP72 (American Century Plant) Forms a large, upright habit of dark green leaves with a wide, butter yellow margin. The leaves can measure up to 3in wide, with toothed notches lining the margins. Light green color appears where the margin and centers overlap.

S/24-36in/Z8-10/72ct ①

Recommended Finish Size: 1-Qt

**Agave bracteosa 'Monterrey Frost'**

**WGI Exclusive**

AGAMF72 (Squid Agave) Rare form. Ribbon-like, arching, narrow leaves have light green centers and creamy white, smooth edges compared to its spiny cousins. Makes a stunning specimen in containers. Prefers partial to bright shade.

S/12in/Z8-10/72ct ①

Recommended Finish Size: 1-Qt

**NEW! Agave bracteosa 'Stingray' PPAF**

**WGI Exclusive**

AGAST72 (Squid Agave) The unique shape of 'Stingray' is similar to 'Monterrey Frost', but with creamy yellow margins instead of white. Tentacle-like, narrow and twisty leaves give this a very unique look.

S/14-16in/Z8-10/72ct ①

Recommended Finish Size: 1-Qt

**Agave 'Desert Diamond' PP26384**

**WGI Introduction**

AGADE72 (Variegated Butterfly Agave) Sport of 'Kissho Kan' with more vivid variegation. Green leaves have bright cream margins lined with cinnamon spines. Forms a remarkably symmetrical, small, rounded rosette that remains small. Excellent for troughs and dish gardens.

S/12-15in/Z9-10/72ct ①

Asexual propagation prohibited.

Recommended Finish Size: 1-Qt

**Agave desmettiana 'Desert Sunset'**

**WGI Exclusive**

AGADS72 (Smooth Agave) Sport of a yellow-edge Agave desmettiana with very wide, bright yellow margins. Two inch wide, sword-like leaves have dark blue-green centers and an arching, upright habit. Cinnamon terminal spines. Joint discovery of Hans Hansen and Tony Avent.

S/20-30in/Z9-11/72ct ①

Recommended Finish Size: 1-Qt

**Agave gypsophila 'Ivory Curls'**

AGAIC72 (Gypsum Century Plant) A variegated form of A. gypsophila but with half inch wide, ivory margins. Wavy, spined, blue-gray leaves. Best color in full sun; greener in part shade. From Stan Walkley.

S/24-36in/Z9-11/72ct ①

Recommended Finish Size: 1-Qt

# Succulent Perennials

**Agave neomexicana 'Sunspot'**

**Agave ovatifolia 'Frosty Blue'**

**Agave parryi ssp. truncata**

**Agave 'Ripple Effect' PPAF**

**Agave romanii 'Shadow Dancer'**

**Agave schidigera Queen of the White Thread ('Shira ito no Ohi')**

**Agave xylonacantha 'Frostbite'**

**Agave neomexicana 'Sunspot'**  
AGASU72 (New Mexico Agave) A yellow margined sport of the small-scaled *A. neomexicana*. Dark blue-green glaucous leaves have long brown terminal spines and creamy yellow margins to form a rigid rosette. From David Salman of High Country Gardens.

S/10-12in/7b-10/72ct ①  
Recommended Finish Size: 1-Qt  
☞ ⚙️ 🍷 🍹 🗑️ 🚫

**Agave ovatifolia 'Frosty Blue'**  
**WGI Exclusive**

AGAFB72 (Whale's Tongue Agave) One of the most cold hardy Agaves. Forms a solitary rosette of short, broad, cupped leaves lined with small teeth and tipped with steel grey, terminal spines. Its distinctive powdery grey foliage has a near-turquoise cast. From Cistus Nursery.

S/2-3ft/Z7b-10/72ct ①  
Recommended Finish Size: 1-Qt  
☞ ⚙️ 🍷 🍹 🗑️ 🚫

**Agave parryi ssp. truncata**

AGATR72 (Hardy Century Plant) Often described as the most beautiful of all Agave species. Forms a perfectly symmetrical rosette of wide, rounded, blue-grey leaves

tipped with a short, dark spike. At maturity, it produces an incredible 20ft tall flower spike.

S/18in/Z(7)8-9/72ct ①  
Recommended Finish Size: 1-Qt  
☞ ⚙️ 🍷 🍹 🗑️ 🚫

**NEW! Agave 'Ripple Effect' PPAF**  
**WGI Exclusive**

AGARE72 (Hardy Century Plant) Intense blue-green leaves; waxy coating draws out the blue coloring. Toothed marginal spines and extremely long, cinnamon brown terminal spines accentuate the bright colors of the leaves.

S/12-14in/Z9-10/72ct ①  
Recommended Finish Size: 1-Qt  
☞ ⚙️ 🍷 🍹 🗑️ 🚫

**Agave romanii 'Shadow Dancer'**

AGASD72 (Century Plant) A petite Agave with interesting coloration. Newest leaves are pale green with a thin, darker green margin. Centers lighten to near-white. Razor-thin mahogany brown margin edges the slightly cupped leaves. The dark edge really makes the color pop!

S/5in/Z8-10/72ct ①  
Recommended Finish Size: 1-Qt  
☞ ⚙️ 🍷 🍹 🗑️ 🚫

**Agave schidigera Queen of the White Thread ('Shira ito no Ohi')**

AGAQQ72 (Century Plant) Striking specimen forms a solitary rosette of narrow, lance-shaped leaves lined with numerous white filifers. Dark green leaves have sharply contrasting, creamy yellow to white margins. Sharp, cinnamon terminal spines.

S/12in/Z8-10/72ct ①  
Recommended Finish Size: 1-Qt  
☞ ⚙️ 🍷 🍹 🗑️ 🚫

**Agave xylonacantha 'Frostbite'**  
**WGI Exclusive**

AGAFR72 (Century Plant) This rare, exciting selection offers incredible variegation and biting spines lining the scalloped leaves. Long, narrow, rigid leaves are dark green with creamy yellow to crisp white margins. Broad spreading, solitary rosette.

S/18-24in/Z8-10/72ct ①  
Recommended Finish Size: 1-Qt  
☞ ⚙️ 🍷 🍹 🗑️ 🚫

## Mad About Mangave® Collection

As crosses between Agave and Manfreda, members of the MAD ABOUT MANGAVE® Collection are the best of both worlds: the refined habit of Agave with the interesting patterns and quicker growth rate of Manfreda.

**Manfreda undulata**  
**'Cherry Chocolate Chip' PPAF**

**NEW! Manfreda undulata**  
**'Cherry Chocolate Chip' PPAF**

**WGI Introduction**

MANCH72 (Perennial Deciduous Agave) Sport of 'Chocolate Chip' with a touch of cherry red coloring. A low, spreading rosette with long green leaves containing chocolate spots and wavy-edged margins. Thin, creamy white margins have cherry red spotting.

S/6-8in/Z7b-10/72ct ①

Asexual propagation prohibited.

**NEW! Mangave**  
**'Bad Hair Day' PPAF**

**WGI Introduction**

MAGBH72 (Mangave) Narrow, flat lime green leaves form an arching habit. Each leaf blade has light blush red spotting with a distinct blush toward the tips of the leaves. This is very easy to handle due to its soft, flexible leaves.

S/8-10in/Z7b-11/72ct ①

Asexual propagation prohibited.

**NEW! Mangave 'Carnival'**  
**PPAF**

**WGI Introduction**

MAGCA72 (Mangave) Sport of 'Jaguar'. Long, lance-shaped leaves are dark green with wide, creamy yellow centers. Newer leaves have chartreuse centers. A smattering of subtle, light red spots dot the leaves, giving a blush tone to the leaves.

S/18-24in/Z8-10/72ct ①

Asexual propagation prohibited.

**Manfreda undulata**  
**'Mint Chocolate Chip' PPAF**

**Manfreda undulata**  
**'Mint Chocolate Chip' PPAF**

**WGI Introduction**

MANMC72 (Perennial Deciduous Agave) Long, silvery succulent, blue-green leaves with near-black spotting form a ground-hugging, low habit. Compared to 'Chocolate Chips', this plant has wider leaves, darker spotting, and more silvery blue leaves.

S/6-8in/Z7b-10/72ct ①

Asexual propagation prohibited.

**Mangave 'Bad Hair Day' PPAF**

**Mangave 'Carnival' PPAF**

Recommended Finish Size: 1-Quart or Premium 1-Gallon Container

# Succulent Perennials

## Mad About Mangave® Collection, cont.

**Mangave 'Catch a Wave' PPAF**

**Mangave 'Falling Waters' PPAF**

**NEW! Mangave 'Catch a Wave' PPAF**  
**WGI Introduction**

MAGCW72 (Mangave) Very thick, silvery blue-green leaves are generously covered with restrained dark spotting. The margins curl upward to show off its marginal teeth. Its upright habit makes it equally attractive from the side and top.

S/8-10in/Z9-11/72ct ①

Asexual propagation prohibited.

**Mangave 'Inkblot' PPAF**  
**WGI Introduction**

MAGIN72 (Mangave) Thick, wide, dark green leaves with blood red spotting arch downward to form a low, wide habit, perfect for framing decorative containers. More exposure to UV light will bring out the dark coloration and the spotting.

S/6-8in/Z(8)9-10/72ct ①

Asexual propagation prohibited.

**Mangave 'Inkblot' PPAF**

**NEW! Mangave 'Falling Waters' PPAF**  
**WGI Introduction**

MAGFW72 (Mangave) Cascading, thick, blue-green leaves have very faint spots that are more pronounced in UV light, highlighting the three-dimensional nature of the plant. Leaves fold upward to display heavily toothed margins.

S/8-10in/Z9-11/72ct ①

Asexual propagation prohibited.

**Mangave 'Kaleidoscope' PPAF**  
**WGI Introduction**

MAGKA72 (Mangave) One of the very best! This sport of 'Jaguar' has many colors present on an arching habit. The long, lance-shaped leaves are deep green with bright rosy red dots and creamy yellow margins. A thin rosy red edge lines the margin, looking nearly orange. Best color is in direct sunlight.

S/20-24in/Z8-10/72ct ①

Asexual propagation prohibited.

**Mangave 'Kaleidoscope' PPAF**

Recommended Finish Size: 1-Quart or Premium 1-Gallon Container

# Succulent Perennials

## Mad About Mangave® Collection, cont.

Mangave 'Lavender Lady' PPAF

Mangave 'Man of Steel' PPAF

Mangave 'Mission to Mars' PPAF

Mangave 'Moonglow' PPAF

Mangave 'Pineapple Express' PPAF

### Mangave 'Lavender Lady' PPAF

#### WGI Introduction

MAGLL72 (Mangave) A unique, feminine beauty with a solitary rosette habit and smoky purple coloration. In direct sunlight, smoky purple, ovate leaves are formed at the top of the rosette and have subdued burgundy purple dots. The leaves lighten to green with age. Tiny white, fairly benign marginal spines. Cinnamon brown terminal spine.

S/8-10in/Z(8)9-10/72ct 1

Asexual propagation prohibited.

### Mangave 'Man of Steel' PPAF

#### WGI Introduction

MAGMS72 (Mangave) Produces a tidy, refined rosette of narrow, sword-like leaves. Attractive silvery green leaves have a waxy coating. Leaves are lined with cinnamon orange margins that are slightly rough to the touch and matching terminal spines. Thinner leaves makes this succulent easy to handle.

S/6-8in/Z(8)9-10/72ct 1

Asexual propagation prohibited.

### Mangave 'Mission to Mars' PPAF

#### WGI Introduction

MAGMM72 (Mangave) An homage to the Red Planet due to the unique, intense red coloration from the leaves. Wide, green leaves form

an arching habit and are heavily speckled with burgundy red, with spots that bleed into each other for an overall red appearance. Best color in direct UV light.

S/8-10in/Z(8)9-10/72ct 1

Asexual propagation prohibited.

### Mangave 'Moonglow' PPAF

#### WGI Introduction

MAGMO72 (Mangave) Cool-looking, silvery blue-green leaves practically glow with huge, contrasting dark purple spots. More UV light levels will enhance the spotting. Flat leaves are held rigidly straight from the base, forming a low, wide, and spiky habit. Relatively soft to the touch.

S/8-10in/Z(8)9-10/72ct 1

Asexual propagation prohibited.

### Mangave 'Pineapple Express' PPAF

#### WGI Introduction

MAGPE72 (Mangave) Refined, spiky habit reminiscent of the top of a pineapple. One inch wide, dark green leaves are long and slender with pronounced burgundy spotting, brought out with UV light. Waxy coating gives the leaves a minty-green finish.

S/18-20in/Z9-11/72ct 1

Asexual propagation prohibited.

Recommended Finish Size: 1-Quart or Premium 1-Gallon Container

Mangave 'Silver Fox' PPAF

New!

Mangave 'Spotty Dotty' PPAF

New!

Mangave 'Tooth Fairy' PPAF

New!

Mangave 'Whale Tale' PPAF

**NEW! Mangave 'Silver Fox' PPAF**  
**WGI Introduction**

MAGSF72 (Mangave) Light green leaves are covered with a thick waxy coating, giving it the appearance of glowing white. Light blue-purple spotting is visible underneath the coating. A magnificent habit, of thick, arching leaves and defined marginal teeth. S/8-10in/Z9-11/72ct 1 Asexual propagation prohibited.

**NEW! Mangave 'Spotty Dotty' PPAF**  
**WGI Introduction**

MAGSD72 (Mangave) Medium green leaves are covered with small, dark burgundy purple spots, folding up at the margins to display sienna orange marginal teeth and long terminal spines. Softly wavy leaves completely overlap each other, leaving little to no gaps. S/10-12in/Z9-10/72ct 1 Asexual propagation prohibited.

**NEW! Mangave 'Tooth Fairy' PPAF**  
**WGI Introduction**

MAGTF72 (Mangave) Long, pronounced spines come in a rainbow of colors, ranging from cinnamon brown to yellow to orange. Blue green leaves show off the colors even more, with faint spotting giving the thick leaves extra character. Forms a singular rosette. S/10-12in/Z9-10/72ct 1 Asexual propagation prohibited.

**NEW! Mangave 'Whale Tale' PPAF**  
**WGI Introduction**

MAGWT72 (Mangave) Large, wide blue-green leaves are lightly speckled with dark spotting. Waxy coating gives the plant a silvery blue look. Its low, wide habit is made of leaves that arch downwards at the tips. S/7-8in/Z9-10/72ct 1 Asexual propagation prohibited.

Recommended Finish Size: 1-Quart or Premium 1-Gallon Container
